Global Distributed Tracking
**By GOSQAS**

Global Distributed Tracking is a software platform enabling **closed-loop tracking** for products, information, and logistics.

Trust and transparency lead our development process. We've optimized Global Distributed Tracking to function in low-resource environments where internet and electricity access is limited.

Our top features include:

✓ Completely free service with no hidden fees

✓ Fully encrypted data

✓ Open source transparency

✓ No downloads

✓ No-hassle security

✓ Tamper-proof, append-only records

Simple data encryption

Fraud detection

Data verification

Supply chain accountability

Quality assurance metrics

End-to-end communication
